

Harrison Spinks

The True Bedmakers

Cut from a *different* cloth

Makers of proudly *different* beds

Every Harrison Spinks mattress and bed is built on a belief in doing things the right way. For our customers. For everyone.

At the heart of our approach is knowing that natural healthy sleep can only be achieved on a mattress that's handcrafted from natural, healthy materials. British wool, homegrown hemp fibres, flax linen and more.

We're passionate about making beds in the most responsible way too. And for us, that means caring where everything comes from. It's why we grow natural comfort fillings on our Yorkshire farm, weave our fabrics in-house and make our own award-winning springs.

Our unique approach to luxury bedmaking makes us different. It's why each and every one we lovingly handcraft is proudly cut from a different cloth.

Supreme comfort, perfectly tailored

It's not one thing that makes our beds unique, but many. Like our layers of sumptuous homegrown fillings, our unique spring systems and our home woven fabrics. All perfectly tailored, around you.

— **Fabrisafe™** our naturally fire retardant mattress fabric, woven exclusively by us. (See page 14)

— Supremely soft natural fillings including British Wool and cashmere, **blended by us, in house.** (See page 8)

— **Homegrown hemp and flax fibres** for comfort breathability and moisture control. (See page 10)

— Our **exclusive MicroHD spring layers**, fine, responsive and contouring springs. (See page 18)

— Our **award-winning Cortec™ glueless pocket springs** provide deep down independent support. (See page 16)

Real homegrown luxury

Welcome to our farm. Just 18 miles from our factory, where every Harrison Spinks bed starts its life.

With acres of homegrown natural hemp fibres, linen flax and our flock of sheep, it's here, on 300 acres of prime Yorkshire land, where our story begins.

We're not only bedmakers, we're sheep farmers too

NO ONE LOVES WOOL, LIKE WE LOVE WOOL

We rear our own happy sheep on our rich, untreated pastures. Being passionate members of the British sheep-farming community, it's important to know where every fleece comes from. So, in addition to wool from our farm, we were the first bedmaker to partner with British Wool to use 100% traceable homegrown wool.

The natural wonder of wool

Soft, springy, antibacterial and fire retardant. When it came to choosing the right natural fillings for our beds, wool was top of the list. Warm in winter, cooling in summer, it's heat and moisture regulating. Keeping you comfortable whatever the weather.

Using the finest quality British wool for our luxury handblended fillings and homewoven fabrics has another healthy benefit too. Naturally fire retardant, all our beds are made without the need to add FR chemicals or undesirable treatments.

More natural fillings means a more luxurious feel

When it comes to your comfort, you can't have too much of a good thing.

Here at Harrison Spinks, we blend our luxurious natural fillings ourselves. And include cashmere, mohair, silk, cotton and of course, our favourite British wool.

A man in a dark t-shirt is shown in profile, working with a large pile of light-colored, fibrous material (likely hemp) in a barn. The background is filled with stacks of similar material, creating a warm, golden-brown atmosphere. The lighting is soft and focused on the man's hands and the material he is handling.

We're the only UK bedmaker to grow luxury fillings on our own farm

IT DOESN'T GET MORE HOMEGROWN THAN THAT

John. Hemp Expert.

Hemp is our hero!

We're particular about quality and committed to making beds in the most responsible way.

So growing much of what we need is the only answer.

It's why we have our own farm and why we love growing hemp.

It's a crop that just keeps on giving.

Generous layers of hemp fibres provide the perfect natural luxury bed experience. And while you're sleeping soundly, the durable fibres are super efficient at absorbing moisture. Helping you keep cool and dry all night.

That's not all they absorb. Each crop sucks more carbon out of the atmosphere than it takes to grow. Plus, in true Yorkshire style, nothing goes to waste. The parts of the plant that don't make it into a Harrison Spinks bed are used for animal bedding, biofuel and sustainable building materials.

Our linen fibres come from our farm too

We use the stems of the pretty blue flax flower to make our natural linen. Up to three times stronger than cotton, they create a lustrous, absorbent and breathable linen.

Luxury fabrics woven by us

WITH LOVE, NOT FR CHEMICALS

Marta. Weaver.

Investing in state-of-the-art looms and re-igniting the long tradition of weaving in the area, **we are the only UK bedmaker to weave our mattress fabric.**

Our exclusive FabriSafe™ cloth is unlike any other bed fabric. Made with quality wool yarn and natural viscose, its unparalleled soft, breathable and luxurious qualities are perfect next to your body.

But that's not the only reason we weave our own. Made with a high wool content, it's naturally fire-retardant. By removing the need to add potentially harmful fire retardant treatments, we've created a safe sleep surface designed for a peaceful nights sleep.

We couldn't find springs good enough

SO WE MADE OUR OWN

Always ambitious, we set our sights on creating a revolutionary spring core that offered not only superior support, but is also capable of being recycled too. After five years of development, Cortec™ was born.

The first ever spring system to unite comfort and sustainability seamlessly.

Chirag. Cortec spring maker.

Cortec™ – our unique glueless pocket system

Long, deep, restful sleep starts deep down in our beds. Designed to isolate and absorb movement, while providing fully independent targeted support, Cortec™ changes everything.

Each individual spring in this award-winning system is ultrasonic welded into its own pocket, not glued like other systems. This unique process gives each spring the freedom to move and support without being stuck, literally, to the springs next to them.

Why no glue?

We don't glue our pocket springs together, for two good reasons. Glue hardens over time, affecting the springs' ability to move freely. Plus, it makes it more difficult to recycle. All our pocket springs are made from just two things. Pocket cloth and British steel. Both are 100% recyclable.

The finest, lightest, micro springs in the world

MICROHD SPRINGS.
SOMETIMES THE BEST THINGS
COME IN SMALL PACKAGES

Our MicroHD springs aren't like anything else.

Each tiny one sits within its own pocket and uses ground-breaking fine wire technology.

Thousands of these are combined and layered into each bed to create a unique feel of ultra-responsive comfort.

Replacing the need for foam, layers of MicroHD springs take comfort and sustainability to another level.

They don't trap heat, moisture or, importantly, don't need to clog up landfill.

Our award-winning MicroHD springs are 100% recyclable at the end of their long and happy life.

Better support means you move less.

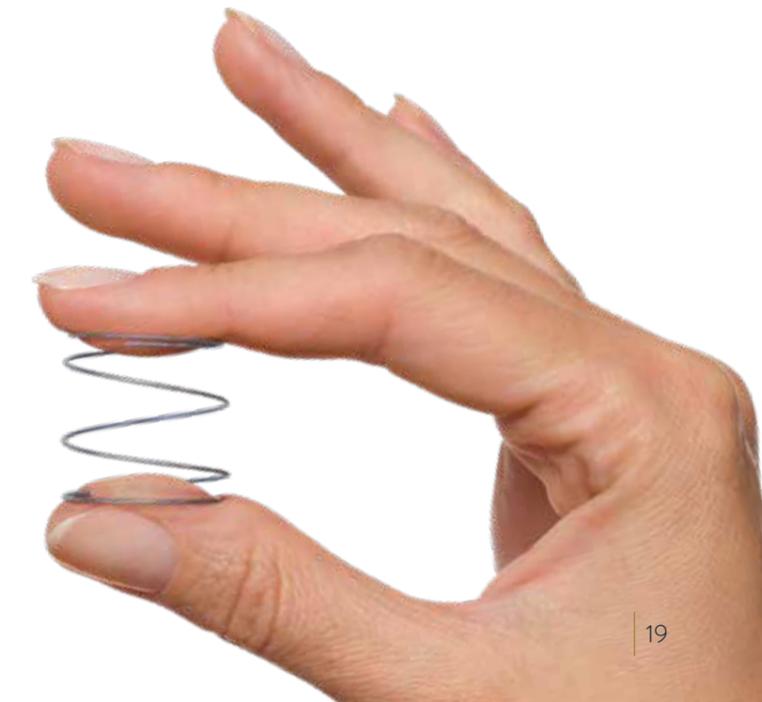

When you move less you sleep better.

Good sleep posture is everything. It's why we use layers of these innovative springs to create supreme comfort for rejuvenating sleep.

They provide perfectly targeted and contoured support from head to toe. Reducing movement and helping you sleep longer and better.

Our finer, lighter, more responsive springs set a new benchmark in foam-free comfort.

Shahzad. Micro spring maker.

Expertly tailored, just for you

THE BEST THINGS IN LIFE
CAN'T BE RUSHED

Andrew. Mattress maker.

You spend a third of your life in bed. It's why we take time to make sure it's the best it can be.

It takes more than years of experience to make each Harrison Spinks bed. It takes a team.

From our experienced designers, springmakers and weavers, to sewers, tufters, side-stitchers and more, our Yorkshire factory blends traditional artisan skills with some 21st century innovations of our own. Our team handcrafts each and every bed, with our hallmark quality and attention to detail.

Supreme comfort – it's all in the blend.

Blending luxurious natural fillings is an art form. It gives our beds their signature feel of natural luxury and it's why we don't trust it to anyone else.

Blended, by our experts, a lot goes into each one. Time, skill, not to mention a finely tuned combination of ingredients including wool, Egyptian cotton, mohair, organic silk, upcycled cashmere and other luxurious fillings.

All are specially chosen for their sumptuous softness, inherent resilience, breathability and temperature-controlling qualities.

The art of sleep, perfected

FIND YOUR HANDCRAFTED MATTRESS

Available in a range of sizes, with tailored spring support and choice of luxurious, responsibly sourced fillings, there's a Harrison Spinks bed for you.

Seasonal Turn

Featuring a warm side for winter and cool side for more comfortable summer sleeping, our range of seasonal turn mattresses keep you at the perfect sleep temperature.

Turn-free

All the carefully crafted layers of deep-down support you would expect, without the need to turn. Simply rotate to keep the mattress at its luxurious best.

Pillowtop

Featuring our innovative spring technology and luxurious fillings. Plus, an additional sumptuous layer that you sleep in, rather than on, it's the ultimate in sleep luxury.

Beautiful beds, crafted with pride

DIVANS AND BASES, MADE THE HARRISON SPINKS WAY

From sleek minimal designs that ooze style and sophistication. To handcrafted ottoman's that turn practical storage into an art form. Whatever your idea of a beautiful bed is. Our master craftspeople will make it.

Made in the same responsible way as our mattresses, and with the same eye for meticulous quality, our bases and headboards only use FSC® certified wood supporting responsible forestry. They are also foam free, making them recyclable. But you won't have to worry about that for a long, long time.

Each elegantly crafted piece is designed for now, but made to last a lifetime.

Asad. Headboard maker.

Exclusive handmade headboards.

Each luxurious Harrison Spinks headboard is made and upholstered by hand in our Yorkshire factory. Made with the same care and commitment to quality as our mattresses, using the finest quality materials, they provide the perfectly stylish setting for the most amazing night's sleep.

The perfect partner to your mattress.

Choose from a variety of stunning designs, upholstered and finished in an array of sumptuous textures and colours. We have a range of different luxurious fabrics and colour options, so you can tailor your headboard and base to your own individual style.

Your handmade base options

COMBINE STORAGE AND STYLE, EFFORTLESSLY

Made by hand, in our Yorkshire factory, to provide the perfect, not to mention practical base, for your Harrison Spinks mattress, we have a range of based divan options.

Storage Divan Base

Featuring a layer of springs for a more supportive base, this deep divan has our True Edge design and is available in four storage drawer options.

Ottoman Base

The ottoman base with glides opens easily and is also available with castors. Only available in 135cm, 150cm and 180cm sizes.

Shallow Divan Base

This shallow base provides a more contemporary look, and has our True Edge design with supportive springs.

Slim Divan Base

With a sleek slim, design this base provides a bedstead design with the same support as a divan base.

Creating a happier, healthier world

ONE BED AT A TIME

We're committed to being the UK's most sustainable bedmaker.

And to get there, we're taking the big steps needed to protect the world and the people around us.

We already lead the way in self-sufficient, vertical manufacturing. Growing, weaving and making much of what we need. But we're not stopping there.

With an in-house sustainability team at the heart of the business, we are doing more than reducing our environmental impact.

We're working with our local communities to raise skills and economic opportunities. We're working towards making our industry more diverse and inclusive. We're funding pioneering projects to rewild huge areas of Yorkshire and Ingleborough.

And that's just the start.

Liam, Mia, George and Becky

What makes us different

WE'RE PROUD TO MAKE BEDS OUR WAY.

We lead the way in self-sufficient bedmaking. Making, weaving and growing much of what we need. It's what makes us different. And what makes our beds, truly amazing.

We're a five-generation
*family -
owned*
Yorkshire business

We're the only UK
bedmaker to have
*our own
farm*
where we grow
*natural
fillings*

Leaders in vertical
manufacturing, we've
transformed how beds
are made by
*growing,
making and
weaving*
much of what we need

Every bed is expertly
handcrafted
by skilled and
highly trained
artisans

We're the only bedmaker
to weave our own mattress
fabric in-house
*naturally FR**
**CHEMICAL
FREE**

*Fire retardant

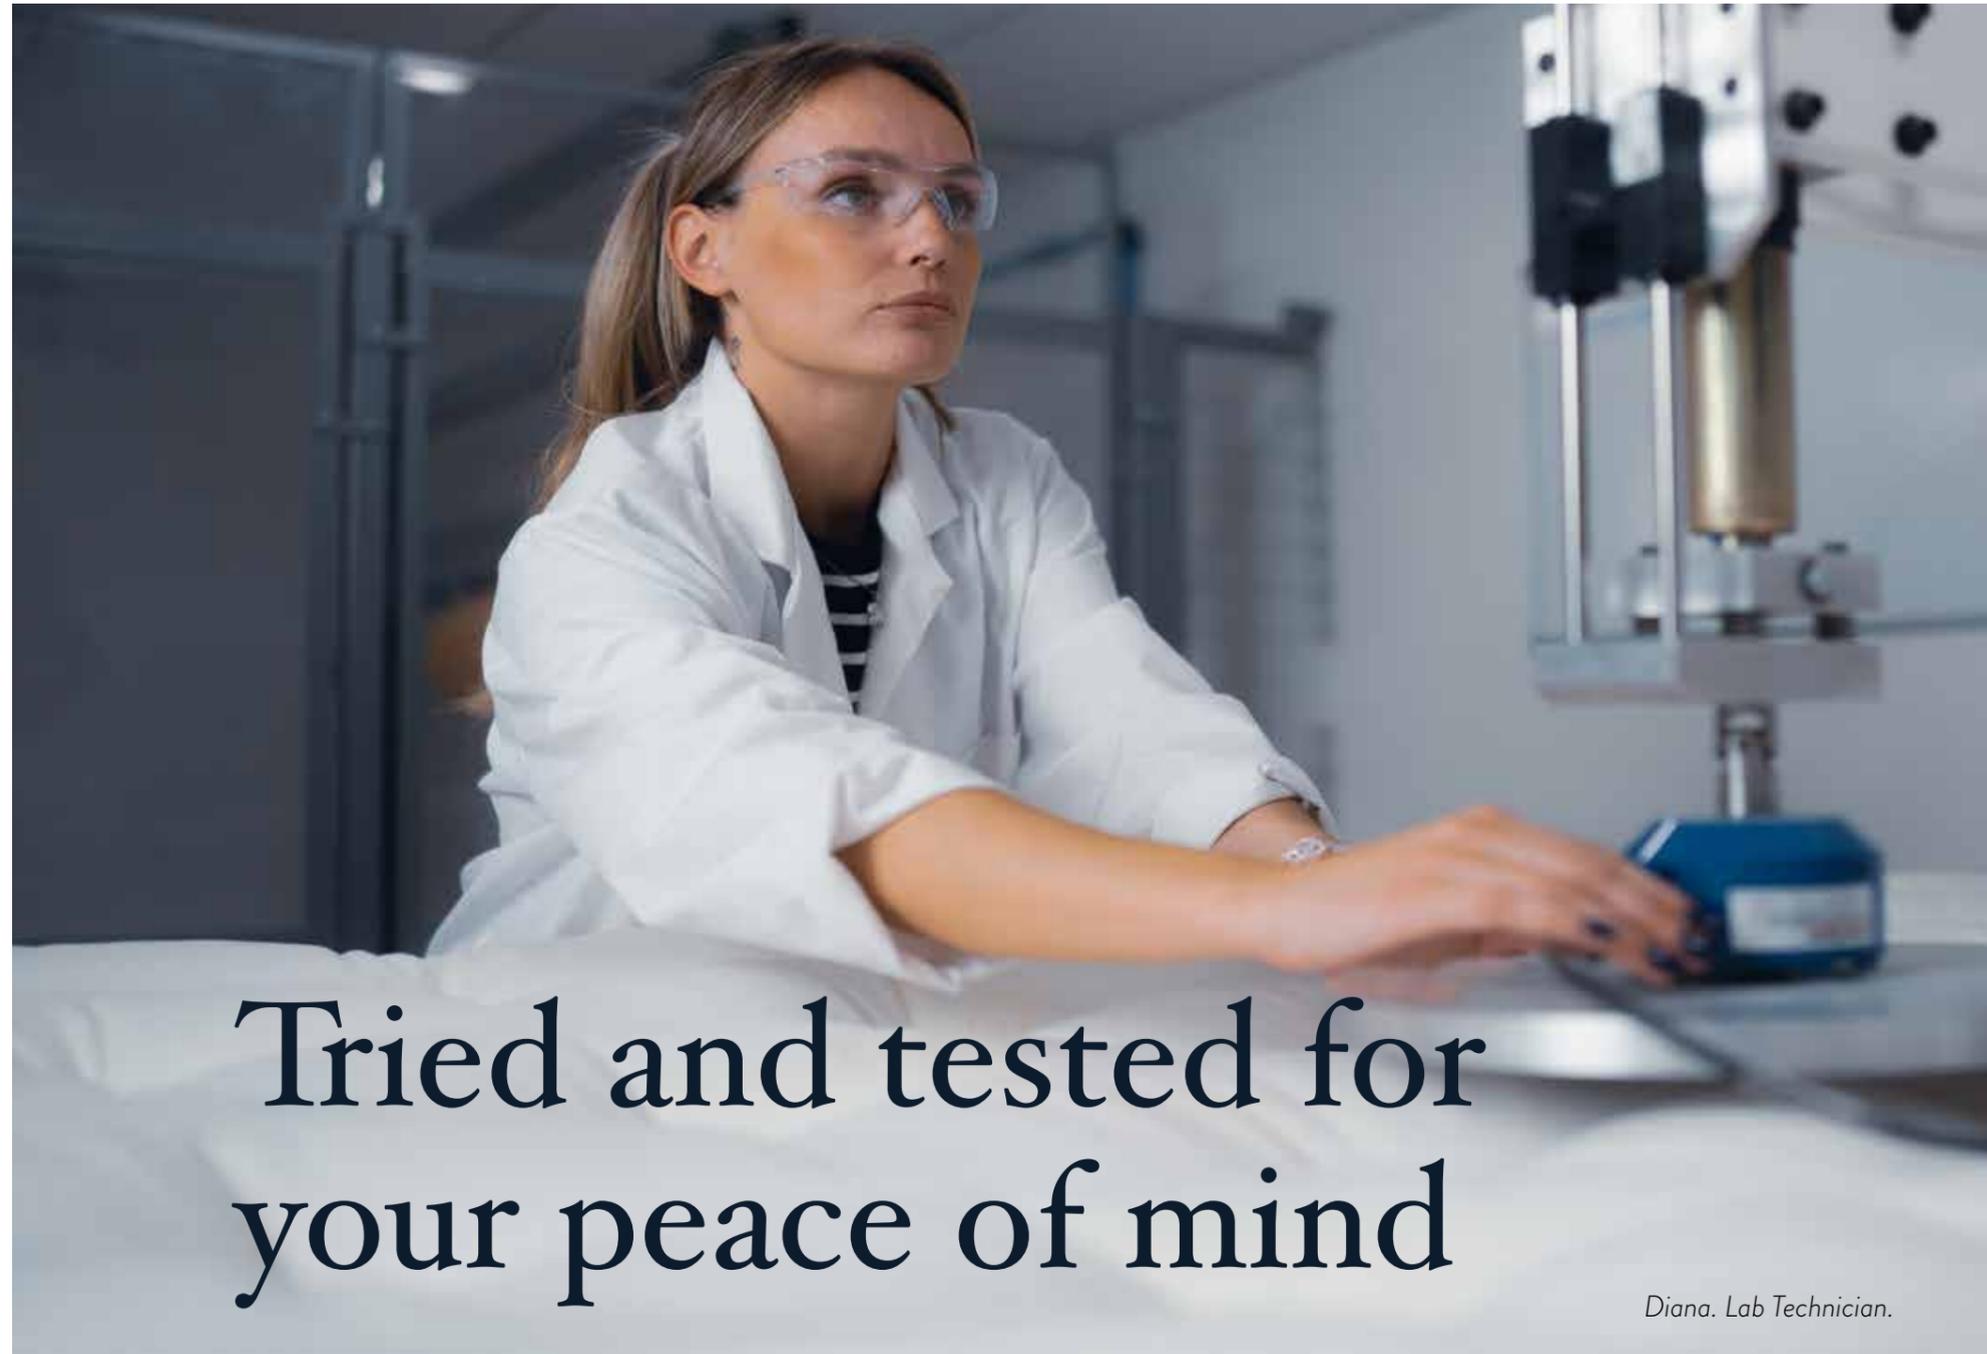

We've developed
*our own
spring
technology*
taking comfort, support
and sustainability to a
whole new level

We're holders of **three**
King's Awards
bringing our total awarded
to date to eight

Tried and tested for
your peace of mind

Diana. Lab Technician.

Our Certifications, Partnerships and Commitments

We're proud of the accreditations we hold. They show our commitment to the environment, our people and of course our customers. Collectively, they guide us and help us improve, as well as providing peace of mind that your bed is made by a business that does things the right and proper way.
